

Appointment Reminders

Businesses lose more revenue from missed appointments than any other area of their business. With CSL's proven appointment reminder you have the power to remind just a few customers or thousands.

- Remind customers of annual appointments

- Send daily reminders
- Notify customers of special events or services available

CTS gives you the power to send a pre-recorded message or have one of our trained personnel relay a specific message. In either case you get a report back of the results, hourly, daily or monthly whichever you choose.
